

Activity Report
of
Outreach Programme held on 21/03/2023
Organized by
Department of Chemistry, Katwa College

On 21st March, 2023, students along with the departmental staff, both teaching and non-teaching, paid a visit to the Goai Premananda Disabled School. The school is also an orphanage home. This has been a plan of Dr. Goutam Nandi, Assistant Professor, Chemistry and when forwarded to the Principal, Dr. Nirmalendu Sarkar, has transformed into an Outreach Programme. The necessary official decorum has been framed as advised by the IQAC Coordinator, Prof. Utpal Das.

This programme has been organized with the motto of providing our students an exposure to the social issues beside their regular studies, an experience beyond the theoretical and practical classes. It is our hope that this day out will give our students a scope to meet people who face several obstacles in everyday life.

All the staff members executed their responsibilities accordingly. We shared the whole day with the inmates of the School. Most of them are either mentally retarded or autistic. Students spent the entire day with them, sang songs, played carom, shared tiffin and lunch, arranged by the departmental staff. In the afternoon, we were able to give dresses to the inmates and then left for home with the wish to go there again.

Enclosed please find copies participants' signature list and geo-tag photographs.
